

Enhance Citrix® Virtual Apps and Desktops with Digital Workspace Management from Liquidware

Liquidware provides comprehensive user management and monitoring in one convenient suite known as Liquidware Essentials™. This bundle is comprised of ProfileUnity™ with FlexApp™ for User Environment Management and Application Layering and also includes Stratusphere UX™ for superior visibility of digital user experience metrics across any Windows® digital workspace, including Citrix® Virtual Apps and Desktops.

Liquidware Essentials delivers user and application management to enable efficient delivery of the user persona and selected applications based on policies. This approach allows for the best digital workspace experience anytime, anywhere and on any device. Leveraging the Liquidware Essentials bundle reduces infrastructure and user-management costs while improving user experience and flexibility in Citrix environments.

"Customers looking for Citrix Ready verified User Environment Management, Application Layering, and added User Experience Visibility will find great value in Liquidware Essentials bundle. This set of solutions includes specialized features expressly made to support Citrix Virtual Apps and Desktop environments. Our mutual customers will gain additional options to rapidly onboard users, deliver applications and grow and scale their deployments while ensuring a quality user experience."

Senior Manager, Citrix Ready at Citrix

User Environment Management

ProfileUnity delivers full-featured User Environment Management that includes superior Profile Management and Centralized Policy Management that goes beyond Microsoft® Group Policies, as well as advanced features such as Privilege Elevation and Application Rights Management.

- One user profile across VDI, RDS, DaaS & physical workspaces
- Up to 10x faster logons vs. roaming profiles
- Application and user rights management
- Location/context-aware policy and profile capabilities
- Automated migration to Windows 10 & Server 2016/19

Application Layering

FlexApp is an integrated part of ProfileUnity, offering Administrator-assigned Application Layering with optional User Installed Application Layering features. Even complex apps can be assigned on a machine level, per user, group, or context-aware basis. The solution is compatible with virtually all workspaces, including Citrix Virtual Apps and Microsoft® RDS.

- Minimize base images by managing Windows OS images separate from applications
- PackageOnce™ and layer applications to any platform, any Windows OS, and in any cloud-hosted environment
- Reduce the number of Microsoft RDS/Citrix Virtual Apps servers
- Deliver applications quickly at user logon or with Click-to-Layer on-demand technology

Visibility

Stratusphere UX provides industry-leading in-guest metrics that help you head off issues before they become mission-critical showstoppers. The solution supports all platforms and delivery approaches to provide success and minimize risk in all phases of the transformation lifecycle – from assessment and onboarding to proof-of-concept (POC) and pilot, and finally to production.

- Digital Experience Monitoring
- In-depth HDX metrics without the need, complication, or added cost of Citrix ADC
- Diagnose root causes of issues and bottlenecks
- Optimize resource capacity and performance
- Grow and scale Citrix Virtual Apps and Desktop environments

About Citrix Ready

Citrix Ready identifies recommended solutions that are trusted to enhance the Citrix Delivery Center infrastructure. All products featured in Citrix Ready have completed verification testing, thereby providing confidence in joint solution compatibility. Leveraging its industry-leading alliances and partner eco-system, Citrix Ready showcases select trusted solutions designed to meet a variety of business needs. Through the online catalog and Citrix Ready branding program, you can easily find and build a trusted infrastructure. Citrix Ready not only demonstrates current mutual product compatibility, but through continued industry relationships also ensures future interoperability. Learn more at www.citrix.com/ready.

About Liquidware

Liquidware is the leader in digital workspace management solutions for Windows workspaces. The company's products encompass all facets of management to ensure the ultimate user experience across all workspaces – physical, virtual, DaaS or in the cloud. Enterprises across the globe utilize Liquidware solutions to dramatically decrease time spent managing digital workspaces, while delivering increased security, flexibility and scalability. Supported platforms include Microsoft physical, Azure Virtual Desktop (AVD), and RDS desktops, Citrix Desktops, VMware Horizon View, Amazon WorkSpaces (AWS), and Nutanix Frame. Liquidware products are available through a global network of partners. For more information, visit www.liquidware.com or follow on Twitter @Liquidware.
