

P. Meghji Trading Limited

“ Product support is great, and there is continual follow-up when I seek assistance.”

Source: Rueben Moynesh, IT Manager

Stratusphere UX is the industry-leading user-experience monitoring and diagnostics solution, providing:

- User-centric visibility that’s persistent across platform and workspace delivery
- The ability to examine user, machine and application workloads
- Visibility before, during and after the transformation process

Insights

P. Meghji Trading ultimately selected Stratusphere UX as its desktop-monitoring solution after evaluating:

- VMware vRealize

Stratusphere UX was selected over competing products because of its ability to:

- Drill down into details by area (users, machines, applications, etc.)
- Gain a comprehensive view across ALL desktop platforms (physical, virtual, etc.)

The IT manager rated Stratusphere UX’s features/values compared to competitive solutions as follows:

- Capacity Planning: Better
- Application Inventory: Better

Use Case

As a result of incorporating Stratusphere UX into its desktop environment, the organization is now able to:

- Maintain a current inventory of all users, machines, applications and OS
- Track application processes across desktop platforms (physical devices, VDI, RDSH, DaaS)
- Capture critical data about other components of the desktop environment (AD Group Policy, protocols, network, storage, graphics)
