Enhance Citrix® XenApp and XenDesktop User Experience

Liquidware Labs Solutions Provide User Environment Management, Application Layering and Granular End-User Monitoring

Liquidware Labs™

CiTRIX®

Enhance Citrix XenApp and XenDesktop User Experience with UEM, Application Layering and Granular End-User Monitoring

Liquidware Labs provides comprehensive User Management and Monitoring in one convenient suite known as Essentials. This bundle is comprised of ProfileUnity with FlexApp for User Environment Management and Application Layering and also includes Stratusphere UX for superior Visibility of User Experience metrics across any Windows® desktop, including Citrix XenApp and XenDesktop.

Essentials delivers user and application management to enable efficient delivery of the user persona and selected applications based on policies. This approach allows for the best desktop experience anytime, anywhere and on any device. Leveraging the Liquidware Labs Essentials bundle reduces infrastructure and user-management costs while improving user experience and flexibility in Citrix environments.

"**Customers looking for Citrix Ready verified User Environment Management, Application Layering, and added User Experience Visibility will find great value in Liquidware Labs Essentials bundle. This set of solutions includes specialized features expressly made to support Citrix XenDesktop and XenApp environments. Our mutual customers will gain additional options to rapidly on-board users, deliver applications, and grow and scale their deployments while ensuring a quality user experience.**"

Siddharth Rabindran
Senior Manager, Citrix Ready at Citrix

User Environment Management

ProfileUnity delivers full-featured User Environment Management that includes superior Profile Management, and Centralized Policy Management that goes beyond Microsoft® Group Policies, as well as advanced features such as Privilege Elevation and Application Rights Management.

- One user profile across VDI, RDSH, DAAS & physical desktops
- Up to 10x faster logons vs. roaming profiles
- Application and user rights management
- Location/context-aware policy and profile capabilities
- Automated migration to Windows 7/8.x & Server2008/12r2

Application Layering

FlexApp is an integrated part of ProfileUnity, offering Administrator-assigned Application Layering with optional User Installed Application Layering features. Even complex apps can be assigned on a machine level, per user, group, or context-aware basis. The solution is compatible with virtually all desktops, including Citrix XenApp and Microsoft® RDSH.

- Reduce the number of images to manage
- Deliver applications on-demand
- Persistent user-experience on non-persistent infrastructure
- Provision application volumes as VHD or VMDK
- Fully compatible with Citrix Provisioning Services and Machine Creation Services

Visibility

Stratusphere UX provides industry-leading in-guest metrics that help you head off issues before they become mission-critical show stoppers. The solution supports all platforms and delivery approaches to provide success and minimize risk in all phases of the transformation lifecycle — from assessment and onboarding to proof-of-concept (POC) and pilot, and finally to production.
- User-experience monitoring
- Diagnose root causes of issues and bottlenecks
- Optimize resource capacity and performance
- Grow and scale Citrix XenApp and XenDesktop environments

Liquidware Labs is the leading provider of User Environment Management, Application Layering, and Visibility solutions, which is available in its Essentials bundle. Liquidware Labs Essentials is a clear alternative for VMware's "Horizon Application Management Bundle," based on Liquidware Labs' Citrix Ready status, features, innovation, and price.

See chart for comparison.

Liquidware Labs™

About Liquidware Labs
Liquidware Labs™ provides desktop transformation and workspace management solutions for hybrid Windows desktop environments including Citrix® XenApp/XenDesktop and physical Microsoft® Windows PCs. Stratusphere™ FIT and Stratusphere™ UX products deliver visibility into desktop environments and support assessment, design, monitoring and diagnostics (Health Checks). ProfileUnity™ provides just-in-time delivery of User Profiles, context-aware policies, and Application Rights Management. FlexApp™ is an integrated feature of ProfileUnity that enables administrator and user level application layering. Flex-IO™ supports IOPS acceleration in virtual desktop environments. The solutions are available in an extremely cost-effectively priced bundle called Liquidware Labs Essentials. Liquidware Labs products are Citrix Ready and are available through a global network of partners. Visit www.liquidwarelabs.com for further information.
